# LiWire

Y.ANUSHA, B.SRAVANI R.NEHA, SRI KRISHNA PRIYA

## What is LiWire?

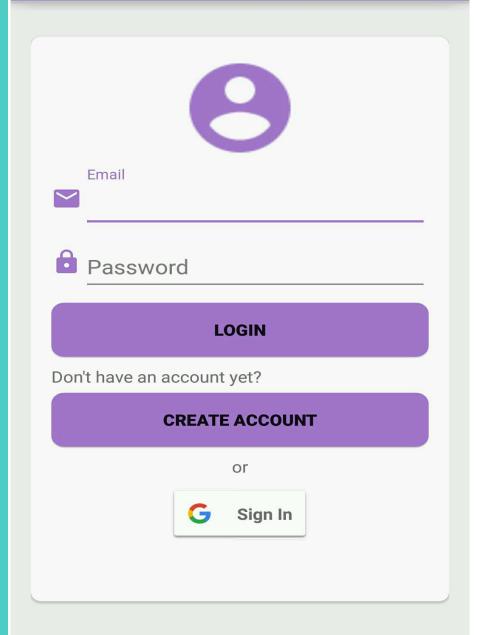

LiWire is an android application developed to give latest trends and updates around the world.

## Streams Included

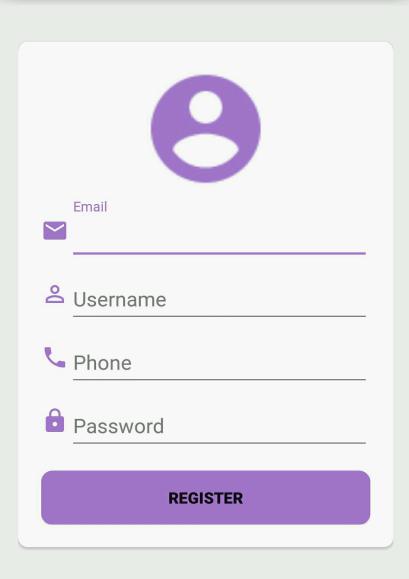

- News stories from different categories around the world like politics, business, entertainment, sports etc.
- Weather report that gives the present temperature, weather conditions in any location.
- > Trending topics from twitter

- Created user profile with sign up page and login page for user.
- Used online database
   www.hostinger.in to
   store the details of a
   particular user.

#### LiWire

Here is the screenshot of signup page. Email, username, phone and encrypted password form a relational schema in the mysql database table created.

# Phase - 2 Weather Report

- We used Yahoo Weather API to get the weather conditions in a location.
- Using YQL query, json response was obtained from which required data is extracted.
- Using GoogleMaps Geocoding Service, gps is enabled to automatically detect temperature from current location.
- Manual location is also enabled to know the weather conditions of different areas. Here are screenshots of current location and manual location (Los Angeles).

### Responses

## Phase -3 NEWS STORIES

News feeds are collected from RSS Feeds of different news channels like NDTV, CNN, TOI. The RSS Feeds were in the xml format as shown below with each item having a title (headline), link to the complete news story, pubdate, category, link to images and short description. These are parsed using xmlpullparserfactory and the details are extracted.

## **Intelligent News feed**

- Uses GPS data to give us regional news.
- Yahoo weather service api gives GPS.

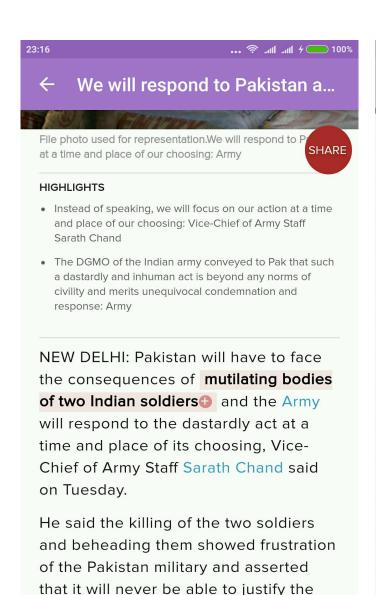

## A sample RSS Feed of NDTV news channel

### News Extended

Each news item as shown above in the screenshot is linked with the url in the feed.On clicking the news item it directs you to the complete news story.

So if a reader is interested in knowing more about an item She/he can view the entire news story.

action.

#### LIVE UPDATES

lyer goes for 33. DD need 38 in 24 balls

11:12 PM (IST), May 02

#### Siraj cleans up Pant

10:53 PM (IST), May 02

The wicket Sunrisers needed the most. Pant was really taking it to the Sunrisers. Timely strike this from Siraj, bowls Pant to a yorker.

#### Nair wicket lifts Sunrisers

10:34 PM (IST), May 02

The real Karun Nair finally showed up at the Feroz Shah Kotla. He was striking the ball well and looked in great touch. After those lusty blows initially, Nair hammered Moises Henriques for 16 in the final over of the Powerplay. He was 39 off 20 before Kaul got his wicket. The ball was full and wide, and Nair had managed to give it the full swing but just couldn't clear Bhuvneshwar at long-on.

11.15 PM (IST), May 02

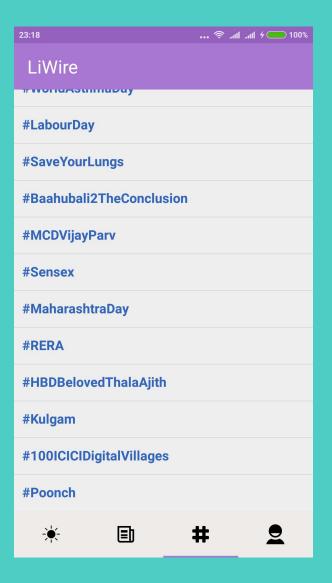

# LET'S KNOW WHAT'S TRENDING

## **Phase - 4 Trending Hashtags**

All the top trending hashtags in twitter are shown. These trends have been collected using twitter API.

- Using consumer\_key, consumer\_secret the url is encoded and http request is sent.
- The response is received in json format
- This json response of tweets is parsed using json parser and the tweets are extracted.

### Trends extended

User can scroll down through all the trends and can click on any hashtag that interests him. This is directed to twitter page with all the posts related to that hashtag. Here is the screenshot.

# THANK YOU!!
